

# Save the Turtle Race

This is like the build a beetle game.

It is best using real plastic items but can be done with just a pencil and paper or printed out pictures of the items.

Print and cut out a turtle for each girl to colour. Provide each girl with 6 different single use plastic items such as a straw, cotton bud, plastic bottle, piece of cling film, shopping bag, plastic spoon and assign each piece a number.

Each time they roll a number they remove that particular piece of plastic. The first person to remove all 6 pieces of plastic is the winner.

Variation: add multiples of certain items such as 4 straws and 2 plastic bottles.
